PROFESSIONAL SUMMARY

Full-Stack Engineer with a Frontend focus having 8+ years of experience in React.js, TypeScript, and Next.js. I build fast, scalable, and pixel-perfect web applications from Figma to production, with a strong focus on clean architecture and user experience. Experienced in design systems, reusable components, and working with global teams. I also have solid experience integrating with backend APIs and handling full-stack aspects when needed.

WORK EXPERIENCE

Wayzen — Frontend Engineer **May 2026 – Present**

- Develop and maintain responsive, high-quality web interfaces and UI components using SvelteKit, TypeScript, and Tailwind CSS.
- Integrate RESTful APIs and collaborate closely with Go backend engineers to ensure seamless frontend–backend integration.
- Participate in frontend architectural decisions, evaluating technical approaches and contributing to scalable, maintainable application architecture.
- Adopt a specification-driven development approach and leverage AI-powered coding tools, including Claude Code and Cursor, to accelerate development, improve code quality, and streamline implementation while maintaining engineering standards.
- Conduct code reviews, provide constructive feedback, and promote best practices, code quality, and consistency across the codebase.
- Collaborate closely with the Product Owner and Design team to translate business requirements and design specifications into production-ready interfaces.
- Work within an Agile environment, following Scrum practices and participating in sprint planning, daily stand-ups, sprint reviews, and retrospectives.
- Identify and resolve frontend issues while improving application stability, usability, and overall user experience.
- Contribute to continuous improvement by identifying opportunities to optimize development workflows, improve code maintainability, and enhance frontend architecture.

ADM — Frontend Engineer **Apr 2021 – 2026**

- Building and maintaining scalable design system library for European and USA markets of HP website.
- Developing modern frontends with React.js, TypeScript, CSS modules and TailwindCSS.
- Creating reusable UI components and documentation in Storybook, improving design-system adoption and development efficiency.
- Writing unit tests with Vitest and React Testing Library to guarantee reliability and reduce production issues.
- Focusing on accessibility, usability, and design consistency across multiple products.
- Conducting code and PR reviews, and ensuring adherence to clean coding practices and project standards.
- Collaborating in Agile teams and integrating CI/CD pipelines with GitHub Actions for smooth deployments.

Upwork — Fullstack Engineer (Freelance) **Aug 2021 – Present**

- Delivering fullstack solutions for clients on Upwork, specializing in React.js and Next.js.
- Building responsive and user-friendly web applications, ensuring cross-browser compatibility.
- Collaborating closely with clients to understand requirements and deliver solutions that meet their business needs.
- Achieving 100% Job Success, demonstrating consistent client satisfaction and reliable project delivery.

EPAM Systems — Software Engineer **Aug 2020 – Mar 2021**

- Developing enterprise Frontend applications using modern JavaScript framework (React.js).
- Building responsive interfaces and reusable UI components.
- Working in agile teams delivering high-quality features.
- Mentoring Junior Developers, sharing expertise in modern front-end tools and web development best practices.

Nordic Car Company — Frontend Engineer **Aug 2017 – Aug 2020**

- Developing and maintaining a car parts application used by customers and internal teams.
- Implementing responsive, user-friendly interfaces with React.js and SCSS.
- Translating designs from Figma into pixel-perfect components while ensuring consistency across the application.
- Collaborating daily with cross-functional teams via daily calls to discuss progress, blockers, and feature planning.
- Working closely with backend engineers to integrate APIs for dynamic data fetching and updates.

Setanta Sports Georgia — Frontend Engineer **Oct 2017 – Aug 2018**

- Fixing bugs and resolving UI/UX issues across the website.
- Developing new pages and features, ensuring responsiveness and consistency with existing design.
- Collaborating closely with backend developer to implement and integrate APIs.
- Reviewing PHP/Laravel backend code to understand data flow and improve API integration.

Dressler Consulting — Frontend Engineer **Feb 2017 – Jul 2017**

- Creating pixel-perfect markup using HTML and CSS to support Angular developers.
- Working closely with Angular developers to ensure seamless integration of markup with application logic.
- Translating designs into responsive, cross-browser compatible layouts.
- Participating in daily communication to coordinate tasks and resolve issues.

SKILLS

Frontend

JavaScript, TypeScript, React.js, Next.js, Svelte, SvelteKit, HTML5, CSS3, SCSS, TailwindCSS

Backend

Node.js, Express.js, MongoDB, PostgreSQL

Testing & UI

Jest, React Testing Library, Storybook, Chromatic

DevOps & Tools

Git, GitHub, GitLab, GitHub Actions, Docker

EDUCATION

Georgian Technical University – Tbilisi
Bachelor's Degree, 2014

LANGUAGES

Georgian – Native
English – Professional
Russian – Intermediate
